DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 21-36, 45, drawn to device with a substrate having a first perimeter and sensors, an electronics module having a second perimeter and signal acquisition circuitry coupled to an output of the sensors; data transmission circuitry coupled to the signal acquisition circuitry; a power source; leads connecting the substrate to the electronics module for transmitting signals between the substrate and the electronics module, classified in class 73, subclass 866.1 or 754.
- II. Claims 37-43, drawn to a device with a first member comprising sensors; a second member comprising electronics; a conductive cable or conductors connecting the first and second members, wherein the first and second members fit into or onto a robot hand or hands, classified in class 73, subclass 866.

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require

substrate with first perimeter, an electronics module with second perimeter. The combination has the advantage of monitoring conditions at a robot hand that is moving about a processing chamber wherein the processing conditions vary as a consequence of the motion. The subcombination with specific perimeters has separate utility such as fitting within a corresponding holder securing the device in a predefined manner within a chamber.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
